

# Cognadin

Memory & Brain Support  
for Senior Dogs

## Protect Your Senior Dog's Brain

As dogs age they may experience a condition called Cognitive Dysfunction Syndrome (CDS) where their cognitive abilities progressively decline. Observation at home and regular veterinary consultations can help to identify these early signs. Your veterinarian can prescribe supplements and steps to help improve your senior dog's cognitive function and associated behaviour.

## Symptoms of CDS to watch for include:

- 🐾 Increased daytime sleeping
- 🐾 Decreased activity and stamina
- 🐾 Increased evening barking and howling
- 🐾 Soiling/accidents indoors
- 🐾 Appears disoriented or confused
- 🐾 Increased pacing or wandering
- 🐾 Not responding to commands or their name
- 🐾 Change in attitude and playfulness
- 🐾 Increased aggression with owner or other pets
- 🐾 Change in appetite

## When and how to provide cognitive care:

Many dogs begin to show signs of CDS by seven years of age. Speak with your veterinarian if you see any of the above symptoms. Consider proactive care - cognitive care supplements and mental stimulation can optimise your dog's brain health before age-related behaviours begin.

# Protect your dog with Cognadin

## Memory & Brain Support for Senior Dogs

Cognadin from UBAVET is a unique nootropic supplement of essential omega-3 fatty acids, antioxidants and vitamins (phosphatidylserine, B vitamins, ginkgo biloba, resveratrol and Vitamin E) to support brain health and reduce the behaviours related to cognitive aging and mental stress.

- 🐾 Encourages healthy cognitive function
- 🐾 Promotes youthful memory health
- 🐾 Aids with training and learning
- 🐾 Helps maintain brain cell connections
- 🐾 Allergy-safe, free of artificial colours and flavours
- 🐾 Veterinary-strength, Health Canada approved
- 🐾 Product of Canada

## B Vitamins

Cognadin contains a unique blend of six B vitamins to support canine brain health. B vitamins help to produce energy needed to develop new brain cells and neurotransmitters, the brain's chemical messengers to the body.

- 🐾 **Vitamin B1 (Thiamine)** - Converts food into energy for the brain. May improve memory and learning ability
- 🐾 **Vitamin B3 (Niacin)** - Powerful antioxidant to protect brain cells and support memory function
- 🐾 **Vitamin B6 (Pyridoxine)** - Decreases homocysteine levels that have been associated with memory impairment
- 🐾 **Vitamin B7 (Biotin)** - Assists with neurotransmitter activity
- 🐾 **Vitamin B9 (Folic Acid)** - Helps the body make healthy new red blood cells to carry oxygen to the brain
- 🐾 **Vitamin B12 (Cobalamin)** - May play a role in preventing brain atrophy (cell loss), memory loss and dementia

## EPA and DHA Omega-3

The brain is primarily made of lipids, including essential fatty acids. To support these components of the brain, Cognadin contains EPA and DHA omega-3 fatty acids, sourced from wild caught herring, anchovy and mackerel.

- 🐾 **EPA (Eicosapentaenoic Acid)** - Helps to reduce neuro-inflammation and may decrease signs of depression
- 🐾 **DHA (Docosahexaenoic Acid)** - The main omega-3 fat in the brain and essential for a functional nervous system

# Antioxidants

## Memory & Brain Support for Senior Dogs

Cognadin contains a unique blend of six antioxidants for added brain health benefits. Due to its high metabolic activity, the brain is more susceptible to damage from free radicals (unstable atoms) than other parts of the body. Antioxidants extract free radicals from the body to protect the brain, heart and other organs.

- 🐾 **Phosphatidylserine** - Protects brain cells and carries messages between them. Important for memory
- 🐾 **Ginkgo Biloba Extract** - For improving blood flow related to memory and concentration
- 🐾 **Acetyl L-Carnitine** - May improve several aspects of brain health, including mitochondrial function, activity of the neurotransmitter acetylcholine, and possibly cognition
- 🐾 **Coenzyme Q10** - Also known as CoQ10, is a compound that helps generate energy in cells
- 🐾 **Resveratrol (Grape Seed Extract)** - Potent antioxidant and anti-inflammatory compound to protect brain cells from damage
- 🐾 **D-alpha-tocopherol (Vitamin E)** - Important antioxidant that protects brain cells from damage

## Dosage and Ingredients

### Dosage:

For dogs only. For all breeds and sizes. Not for use with puppies or pregnant or lactating dogs. Administer complete capsule or pull open and pour contents onto food.

Recommended dosages:

- Less than 14 kg. (30 lbs.) - 1 capsule daily
- 14.1 kg. (31 lbs.) to 23 kg (50 lbs.) - 2 capsules daily
- 23.1 kg (51 lbs.) and greater - 3 capsules daily

### Active ingredients per capsule:

Phosphatidylserine 25 mg, L-Carnitine 10 mg, Vitamin B6 20.5 mg, Vitamin E 33.5 mg, Resveratrol 5 mg, Vitamin B3 15 mg, Thiamine 10 mg, Biotin 10 mg, Vitamin B12 20 µg, Ginkgo biloba 10 mg, Docosahexaenoic acid (DHA) 74 mg, Eicosapentaenoic acid (EPA) 16 mg, Coenzyme Q10 10 mg, Folic acid 30 µg

### Non medicinal ingredients:

Fish oil, Cellulose (capsule casing), Octadecanoic acid

## About Us & Where to Buy

UBAVET is a leading supplier of veterinary nutritional supplements. Founded in 1994, UBAVET is proudly Canadian owned and operated, with vast experience in veterinary and animal health. Our key areas of expertise are the treatment of age-related mobility and wellness issues; including cognitive, skin, coat, circulatory, digestive, dental and immune system health.

UBAVET products and their ingredients are registered and approved by **Health Canada** as veterinary health products (VHP). All UBAVET products are guaranteed and available exclusively through Canadian veterinary hospitals and clinics.

### Where to Buy:

Cognadin 90ct is available at all veterinary clinics and hospitals in Canada, see [ubavet.com](http://ubavet.com)

Give your veterinarian the code corresponding to their distributor (AVP, CDMV, VP or WDDC) shown below.

COGNADIN 90 Capsules	AVP	CDMV	VP	WDDC
Product Code	9110630	126879	6610960	139920

## Our Guarantee

### Optimum Memory & Brain Function For Your Senior Dog

Cognadin is formulated with a high inclusion of cognitive health ingredients. Within seven to fourteen days you should begin to see cognitive and behavioural improvements.

If you are not satisfied with Cognadin, simply return it to your veterinarian for a full refund. Your veterinarian will then be refunded by UBAVET.

## Mental Stimulation

### For Added Canine Cognitive Health and Mental Wellbeing

In combination with Cognadin support your senior dog's age-related cognitive health and behaviour through mental exercises and activities:

- 🐾 Spend time together, go for walks
- 🐾 Introduce new routines, places, smells and sights
- 🐾 Teach your dog a new trick or command
- 🐾 Introduce a new game or toy with treats hidden inside
- 🐾 Introduce your dog to new people and other dogs
- 🐾 Give your dog a job, such as therapy dog volunteering
